A Binary Large OBject (BLOB) is a collection of binary data stored as a single entity in a database management system.Blobs are typically images, audio or other multimedia objects, though sometimes binary executable code is stored as a blob. Database support for blobs is not universal. Blobs were originally just big amorphous chunks of data invented by Jim Starkey at DEC, who describes them as ...

But a blob is not a reference to a actual file, it may seem like it is. A blob has its size and MIME type just like a file has. Blob data is stored in the memory or filesystem depending on the browser and blob size. A blob can be used like a file wherever we use files. Most APIs for working with blobs are asynchronous.

This is a bit of a +1 comment. I'm trying to do the same thing, and with the same results - a corrupted PDF. The PDF will open, has the same number of pages I expect, but there is no text. I suspect the issue lies in either the encoding of the PDF, or the conversion of it from [resultByes] to a blob...
