when Seurat said "Art is harmony," he was mistaking a means of art for its end. Apart from the relative positions of the colors, of course, their quantitative proportion and the degrees of purity and brilliance are also important. The basic principle of harmony is derived from the physiologically postulated rule of complementaries.

Then, in 1936, the invention of Kodachrome gave colour photography to the world. But black and white photography didn't die off, instead it flourished. Modern black and white photography at its best is art, and many photographers regard it as the purest form of photography. So why does black and white photography command such acclaim?

feeling of depth. Real space is three-dimensional; in visual art, when we create the feeling or illusion of depth, we call it space. Color is light reflected off of objects. Color has three main characteristics: hue (the name of the color, such as red, green, blue, etc.), value (how light or dark it is), and intensity (how bright or dull it is).

The Black Arts Movement (or BAM) was an African American-led art movement, active during the 1960s and 1970s.

Through activism and art, BAM created new cultural institutions and conveyed a message of black pride.. Famously referred to as the "aesthetic and spiritual sister of Black Power," BAM applied these same political ideas to art and literature. The movement resisted traditional Western ...
