river is that of water running continuously from mountain to valley. This may sound obvious, but it is precisely this aspect that allows us to understand what a river is and how it functions. A river is a course of water that originates in the mountains and flows downwards until it reaches the sea. On its perpetual journey, river water crosses ...

The Congo River (also known as Zaire River) is the largest river in Africa. Its overall length of 4,700 km (2,922 miles) makes it the second longest in Africa (after the Nile). The river and its tributaries flow through the second largest rain forest area in the world, second only to the Amazon Rainforest in South America.
