bloom of the diamond stone

Blood diamonds (also called conflict diamonds, war diamonds, hot diamonds, or red diamonds) are diamonds mined in a war zone and sold to finance an insurgency, an invading army's war efforts, or a warlord's activity. The term is used to highlight the negative consequences of the diamond trade in certain areas, or to label an individual diamond as having come from such an area.

The wildflower bloom has already started and is expected to peak in mid- to late-March, when the hillsides will be a carpet of color, said wildlife biologist Bill Wagner. "We've had a limited bloom the past few years scattered around the lake. This year is going to be spectacular, with broad fields of flowers covering the hillsides," he said.

bloom of the diamond stone

In 1956, Benjamin Bloom with collaborators Max Englehart, Edward Furst, Walter Hill, and David Krathwohl published a framework for categorizing educational goals: Taxonomy of Educational Objectives. Familiarly known as Bloom's Taxonomy, this framework has been applied by generations of K-12 teachers and college instructors in their teaching.
