Blue and Gold Macaws Are Wonderful Companions

blue and gold macaw facts

I recently purchased a 6 month old female blue and gold. I've had her now for about a month and have tried to bathe her or spray her gently but she appears to be very afraid of it. Even if I try to gently spray her she just won't have anything to do with it. She will even try to fly off her perch... wings clipped. I know her feathers and skin would benefit from this but I don't want to stress ...

blue and gold macaw facts

A large macaw, which is to be used for breeding, should not be hand-reared unless another large macaw is reared with it. The small macaws have more independent personalities. In my experience they are less affectionate towards their feeder and are unlikely to become imprinted if reared with another small macaw.
